

Ridge Gourd Trials

Objective

To evaluate Boreal Agromineral in field condition as source of nutrient for **RIDGE GOURD** and record yield and compare it to the standard practice.

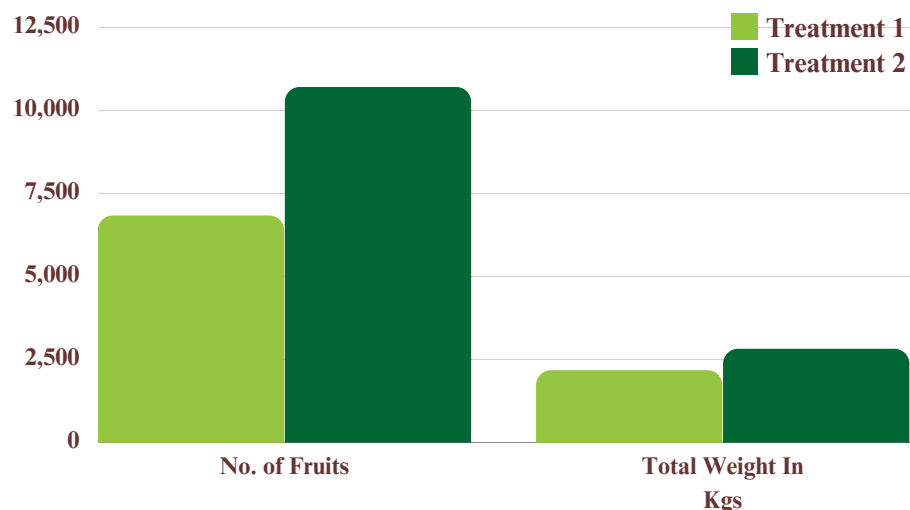

Sowing Date:	June 12th, 2018
No. of Harvests:	21
1st Harvest:	July 24th, 2018
Last Harvest:	October 15th, 2018
Area in Sq. mtr:	1/4 acre
No. of vines in each plot:	21

Yield/Harvest parameters

The observations have been tabulated below:

No. of Fruits		Total Weight In Kgs	
T1	T2	T1	T2
6842	10,711	2181	2825

- T1 - Standard practice
- T2 - Boreal Agromineral plot

Conclusion

Boreal Agromineral recorded better performance in terms of vegetative growth leading to more number of fruits as well as crop harvest as compared to standard practice. Other package of practice remains the same in both treatments.

50% increase in the fruit count and 30% increase in fruit weight.
